Election/Restrictions

Applicant's election with traverse of Group II, claims 5-22 in the reply filed on 1/25/07 is acknowledged. The traversal is on the ground(s) that there is not undue burden to search both groups. This is not found persuasive because there are different considerations for making the product and the product, since the product can be made by a different method. Examiner disagrees about the burden.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

Claims 5-22 are allowable over the prior art.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose or suggest a method for manufacturing a transparent substrate for a display device comprising the forming, subjecting, removing, transcribing and conditions 1-4, as in the context of claim 5:

The closest prior art, JP 2002-287377A, teaches some parts of the claimed invention, but fails to suggest the combination of elements in claim 5. JP 2002-287377A broadly cites to use nanopatterning for light-emitting elements, but fails to suggest the patterning for roughening a transparent substrate to meet the conditions cited. There is no motivation to modify JP 2002-287377A to provide for the conditions cited for glass, as in the context of claim 5.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 5-11 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. 6,825,056 and 7,037,738. Although the conflicting claims are not identical, they are not patentably distinct from each other because since the same steps and materials are used to make a light-emitting device, it would have been obvious to use them for a transparent substrate with the cited conditions to optimize the device for light emission.
